

We are seeking for:

Intermediate Front-end Web Developer

(key skills: Vue.js, JavaScript, Bootstrap Framework)

If you want to be part of the team who aims to set **new revolutionary standards in the field of sports and health coaching** you are at the right place to explore your **new career!**

For our client **AZUM system AG** (headquartered in Zurich, Switzerland) a young company in the field of sports and health coaching with a start-up culture, we are looking for a **Front-end Web Developer** with knowledge in Vue.js, JavaScript ES6 and Bootstrap Framework.

We are looking for personalities with a proactive and goal-oriented way of working who have a high understanding of internal and external customer concerns. We want ambitious specialists with project experience who, in addition to technological competence, consider the cooperation between business and IT to be an important success factor.

Our expectations of you

Minimum requirements

- 2-4 years of experience with Vue.js
- 2-4 years of experience with JavaScript, ES6
- Experience in Bootstrap Framework (v3, v4)

Additional requirements

- Advanced knowledge of HTML/CSS3
- Experience with the Django development Framework (v2.x) + Python 3
- Experience working with GNU/Linux & Git

Nice to have

- Experience with Scrum and/or Kanban;
- Knowledge in chart.js,
- Jira & Bitbucket

Responsibilities

- Technical solution design & development of specifications
- Implementation of further developments in the AZUM system platform (implementation of new functionalities, improvement of existing features/interfaces, bug fixing, etc.)
- Integration of external and internal Web Services/REST APIs

About AZUM System
