

Based in Cyprus with offices in Belgium and Dubai, Media Plus recruits and trains people to work for international press and advertising agencies specialized in the production of promotional economic country reports directed at the world's business community. These reports aim to inform readers of economic conditions, investment climates and business opportunities worldwide. Such information is gathered through personal meetings with government ministers and managing directors or presidents of the nation's "top 100 companies". The content of the country report covers both editorial and commercial (advertising) perspectives.

These reports are featured in leading American and European magazines and on influential business television networks. Our sales offices are in Belgium, England, Cyprus and Dubai.

We are currently looking for a person to assist us with fine tuning the CRM system. We programmed our own tailor-made CRM, accustomed to the needs of Media Plus. Therefore we want to hire an **international freelance IT profile: JS/PHP Developer** to support the salesperson.
