**COMPANY BACKGROUND**

Retell is a British company that was founded in 1986. It makes and sells call recording and IVR equipment mostly in the UK and in other European and worldwide markets as well. Amongst our strategic partners are PBX manufacturers such as NEC, Panasonic and others.

Our flagship product is Sense which has been on the market for over 5 years. Retell telephone recording equipment, by our estimate, records over two million people every day. It is a hardware and software solution. We use many technologies: C on our embedded hardware, C ++, C# on our back end, PHP and JavaScript on our GUI, MS SQL database, SIP, MGCP and much more. We also make use of several open source projects. For more information about Retell, please visit Retell's web site: [www.retell.co.uk](http://www.retell.co.uk).
