

## Software Developer

### Development Division

Since its foundation in 1923, the KESSLER Group has developed into the world's leading manufacturer of motor spindles, direct-drive milling heads and turning/swivel tables for machine tool industry.

Based on its core competence in the development of electric drives, KESSLER brings artificial intelligence to its products and sets new standards for future-oriented markets.

#### Your working area

Together with us, you design new products in the field of data analysis and machine learning. Such products will integrate algorithms that will trigger certain reactions to improve processes or protect machines. All information generated during such processes will have to be available online via cloud applications.

#### Your responsibilities

- Database application (MongoDB)
- Cloud Applications (MongoDB Atlas)
- Logging software (Go)
- Web applications (frontend: React, backend: GraphQL API using Go)
- Database applications (SQL)
